

## NAVIGATION SYSTEM

# EZ-Pilot Pro

The guidance system EZ-Pilot Pro provides precision guidance for different tractors and harvesters. The added benefit of EZ-Pilot Pro is that vehicles can be maintained with guided activated in reverse to align with the next pass. Adding this functionality allows users to have high accuracy from the implement touches the ground.

The guidance system EZ-Pilot Pro improved accuracy by using the NAV-900 controller and the GFX-750™. The high level of accuracy allows the guided maintain control forward and reverse. This is especially important for high value crops and small plots where all the land is cultivated.

### Reduce fatigue

With automatic guidance, EZ-Pilot system allows you to easily operate and improve safety on the farm.

### MOVING AHEAD

It maintains guidance activated when this stopped and restarted.

### Intuitive Interface

The farmer using EZ-Pilot Pro can increase levels of accuracy in controlling various implements new machines with its simplified interface.

### SIMPLIFIED COMPONENTS

The system can be preinstalled and transferred among several machines with only a single cable in the cabin.

### OPTIMAL PERFORMANCE

The EZ-Pilot Pro system allows you to maximize the operating time helping to complete agricultural operations with speed, efficiency and productivity.

### Key features

- ▶ High accuracy at an affordable price
- ▶ Keep vehicles driven for 15 seconds in reverse.
- ▶ It stays connected when stopped
- ▶ Reduced number of components allow quick transfer between vehicles
